

Windows 10 OpenVPN SETUP

1. Download and install the OpenVPN software from openvpn.net.
Make sure to allow the TAP drivers to install when you receive the pop-up later on during the installation.
2. Download the OpenVPN configuration files from our website.
(Support&Downloads > Downloads> VPN Manual Setup Guides)
3. Please open the location you saved the zip file, then proceed to extract the files
4. Once the files are extracted, please move `cfg.ovpn` and the `.crt` certificate file to your OpenVPN config folder at (`C:\Program Files\OpenVPN\config`).
Please note that OpenVPN can only display 50 servers.
5. Run the OpenVPN GUI as Administrator by right clicking the OpenVPN GUI shortcut and clicking 'Run as administrator'.
6. Right click the OpenVPN status icon on the bottom right of your taskbar to open the OpenVPN GUI menu.
7. Choose and connect to a server by hovering over the server and clicking the connect option that appears in the menu to the right.
8. Enter your DathoVPN username and password when prompted and click OK.
9. You should now be connected. If you run into any issues please contact support at support@dathovpn.com
10. You can view that you are connected by right clicking the OpenVPN GUI status icon in the bottom right of our taskbar and seeing that there is a check mark next to the server you connected to.
